DEGREE CERTIFICATE MASTER OF SCIENCE (ECONOMICS AND BUSINESS ADMINISTRATION)

Aalto University
School of Business

Olli Anton Järvinen
(120999-585D)

has completed the following second-cycle degree as provided in the government decree on university degrees and professional specialisation programmes (794/2004): Master of Science (Economics and Business Administration) (120 credits), Master's programme in Information and Service Management.

The graduate is granted the right to use the Finnish title of ekonomi.

31 July 2026

TIMO KORKEAMÄKI
Dean

This degree certificate has an electronic signature which you can validate at <https://dvv.fineid.fi/en/validation>. Contact Aalto University to verify degree completion and authenticity.

This degree certificate is composed of three parts: in addition to this certificate, it contains a transcript providing information on the studies included in the degree, and a diploma supplement for international use, providing information on the university and the completed degree, its level and its status in the Finnish education system. This degree certificate has been issued in two original copies, one in Finnish or Swedish and the other one in English.

MASTER OF SCIENCE (ECONOMICS AND BUSINESS ADMINISTRATION)

First names	Olli Anton
Last name	Järvinen
Personal identity code	120999-585D
Student number	1018062
Degree programme	Master's programme in Information and Service Management (120 credits)
Field of education	Fields of education (Ministry of Education and Culture), Business, administration and law
Date of the degree	31 Jul 2026

Content of the degree

	Scope	Grade
Information and Service Management	57 cr	5
Master's Thesis	30 cr	5
Electives	33 cr	5
Total number of credits completed for the degree	120 cr	

The degree includes the thesis **A Service Operations Perspective on Educational Efficiency: Benchmarking Aalto University School of Business** which was approved with the grade of 5 (excellent). The scope of the thesis is 30 credits.

The degree was completed **with honours**.

GRADING SCALES AND DESCRIPTIONS FOR COMPLETED STUDIES

The scope of studies is measured in ECTS credits (cr). The average workload of 1 600 hours needed to complete one academic year of studies corresponds to 60 credits.

The average grade of study attainments is calculated from courses which have been graded on a scale from 0 to 5 (fail–excellent) and which the student has passed. The average grade is weighted according to the courses' scopes in credits. The average grade is only displayed if at least half of the scope of the degree or the study module has been graded using the scale from 0 to 5.

Language of study

Finnish	2 cr
Swedish	0 cr
English	118 cr
Other	0 cr

Language of study: fi (Finnish), sv (Swedish), en (English).
The language of study is not defined for all completed studies.

Grading scale for completed studies

5 (excellent), 4 (very good), 3 (good), 2 (satisfactory), 1 (passable), 0 (fail)

Pass (Pass), Fail (Fail)

Grading scales for theses

5 (excellent), 4 (very good), 3 (good), 2 (satisfactory), 1 (passable), 0 (fail)

TUTKINTOTODISTUS KAUPPATIETEIDEN MAISTERI

Aalto-yliopisto
Kauppakorkeakoulu

Olli Anton Järvinen
(120999-585D)

on suorittanut yliopistojen tutkinnoista ja erikoistumiskoulutuksista annetun valtioneuvoston asetuksen (794/2004) mukaisen ylemmän korkeakoulututkinnon: kauppätieteiden maisteri (120 opintopistettä), tieto- ja palvelujohtamisen maisteriohjelma.

Tutkinnon suorittaneella on oikeus käyttää arvonimeä ekonomi.

31. heinäkuuta 2026

TIMO KORKEAMÄKI
dekaani

Tämä tutkintotodistus on sähköisesti allekirjoitettu. Allekirjoituksen aitouden voi tarkastaa osoitteessa <https://dvv.fineid.fi/fi/validation>. Tutkintotodistuksen oikeellisuuden ja tutkinnon suorittamisen voi todentaa Aalto-yliopistosta.

Tämä tutkintotodistus on kolmiosainen: tämän todistussivun lisäksi siihen kuuluvat opintosuoritusote, joka sisältää tiedot tutkintoon kuuluvista opinnoista, ja kansainväliseen käyttöön tarkoitettu Diploma Supplement, jossa on tiedot yliopistosta sekä suoritetusta tutkinnosta, sen tasosta sekä asemasta Suomen koulutusjärjestelmässä. Tämä tutkintotodistus on annettu kahtena alkuperäisenä kappaleena, toinen suomeksi tai ruotsiksi ja toinen englanniksi.

KAUPPATIETEIDEN MAISTERI

Etunimet	Olli Anton
Sukunimi	Järvinen
Henkilötunnus	120999-585D
Opiskelijanumero	1018062
Tutkinto-ohjelma	Tieto- ja palvelujohtamisen maisteriohjelma (120 opintopistettä)
Koulutusala	OKM:n ohjauksen ala, Kauppa, hallinto ja oikeustieteet
Tutkinnon myöntämispäivä	31.7.2026

Tutkinnon sisältö

	Laajuus	Arvosana
Information and Service Management	57 op	5
Maisterin tutkinnon opinnäyte	30 op	5
Vapaasti valittavat opinnot	33 op	5
Tutkintoon sisältyvät opinnot yhteensä	120 op	

Tutkintoon sisältyvä opinnäyte **A Service Operations Perspective on Educational Efficiency: Benchmarking Aalto University School of Business** (Koulutuksen tehokkuusmittaus palvelutoiminnan näkökulmasta: Aalto-yliopiston kauppakorkeakoulun opetuksen tehokkuuden vertailuanalyysi) on hyväksytty arvosanalla 5 (erinomainen). Opinnäytteen laajuus on 30 opintopistettä.

Tutkinto on suoritettu **erinomaisesti**.

Opintosuoritusten keskiarvo 5

OPINTOSUORITUSTEN ARVOSANA-ASTEIKOT JA SELITTEET

Opintojen laajuutta mitataan opintopisteinä (op). Yhden lukuvuoden opintojen suorittamiseen keskimäärin vaadittava 1600 tunnin työpanos vastaa 60 opintopistettä.

Opintosuoritusten keskiarvo lasketaan hyväksytysti suoritetuista opintojaksoista, jotka on arvioitu asteikolla 0–5 (hylätty–erinomainen). Keskiarvo on painotettu opintopistelaajuudella. Keskiarvo näytetään vain, jos vähintään puolet tutkinnon tai opintokokonaisuuden laajuudesta on arvioitu asteikolla 0–5.

Opintojen suorituskieli

Suomi	2 op
Ruotsi	0 op
Englanti	118 op
Muut kielet	0 op

Suorituskielen selitykset: fi (suomi), sv (ruotsi), en (englanti).
Kaikille opintosuorituksille ei ole aina määritelty suorituskieltä.

Opintosuoritusten arvosana-asteikot

5 (erinomainen), 4 (kiitettävä), 3 (hyvä), 2 (tydyttävä), 1 (välttävä), 0 (hylätty)

Hyv. (Hyväksytty), Hyl. (Hylätty)

Opinnäytetöiden arvosana-asteikot

5 (erinomainen), 4 (kiitettävä), 3 (hyvä), 2 (tydyttävä), 1 (välttävä), 0 (hylätty)

DIPLOMA SUPPLEMENT

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of this supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates, etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free of any value-judgements, equivalence statements or suggestions about recognition. Information should be provided in all eight sections. Where information is not provided, a reason should be given.

1. INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

1.1 Last name(s)

Järvinen

1.2 First name(s)

Olli Anton

1.3 Date of birth (dd/mm/yyyy)

12/09/1999

1.4 Student identification number or code (if available)

1018062

2. INFORMATION IDENTIFYING THE QUALIFICATION

2.1 Name of qualification and (if applicable) title conferred (in original language)

Kauppateiden maisteri, Master of Science (Economics and Business Administration)

2.2 Main field(s) of study for the qualification

Fields of education (Ministry of Education and Culture), Business, administration and law

2.3 Name and status of awarding institution (in original language)

Aalto-yliopisto, Aalto-universitetet, Aalto University (state recognised university)

2.4 Name and status of institution (if different from 2.3) administering studies (in original language)

Not applicable

2.5 Language(s) of instruction/examination

English

3. INFORMATION ON THE LEVEL OF THE QUALIFICATION

3.1 Level of qualification

See 8. Second-cycle university degree, Master's level

3.2 Official duration of programme in credits and/or years

The degree consists of 120 credits, 2 years of study.
Finnish credits are fully compatible with the ECTS.

3.3 Access requirements

The admission requirement for the second-cycle university degree is a first-cycle degree. There is a numerus clausus, i.e. a restricted entry, to all fields of study.

4. INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1 Mode of study

Full-time

4.2 Programme learning outcomes

Studies leading to a master's degree shall provide students with:

- 1) a good knowledge of the advanced studies of the master's programme;
- 2) the knowledge and skills needed to apply scientific knowledge and scientific methods, or the skills needed for independent and demanding artistic work;
- 3) the knowledge and skills needed when independently operating as an expert and developer of the field and collaborating internationally;
- 4) the knowledge and skills needed for scientific or artistic doctoral education and lifelong learning;
- 5) good language and communication skills for work in the field and the skills to operate and collaborate in an international environment. The education shall be based on research or artistic activity and professional practices in the field.

The detailed learning outcomes of the degree programmes are described in their curricula. In addition to knowledge, the degree aims at giving students the skills needed in the world of work. The learning outcomes take into account the multidisciplinary nature of Aalto University.

4.3 Programme details (e.g. modules or units studied), and the individual grades/marks/credits obtained

See transcript of records.

4.4 Grading scheme and, if available, grade distribution guidance

See transcript of records.

4.5 Overall classification of the qualification (in original language)

Completed with honours (Suoritettu erinomaisesti).

5. INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1 Access to further study

Eligible for doctoral studies

5.2 Access to a regulated profession (if applicable)

Under the Finnish legislation, a person who has taken the degree of Master of Science in Economics and Business Administration (kauppätieteiden maisteri) is qualified for posts or positions in the public sector for which the qualification requirement is a second-cycle higher education degree. In some cases, the qualification requirement also includes the completion of studies in certain specified fields of study. The degree falls under the Article 11 of the Directive 2005/36/EC of the European Parliament and of the Council on the recognition of professional qualifications, level e.

6. ADDITIONAL INFORMATION

6.1 Additional information

The quality assurance system of the university has passed the audit conducted by the Finnish Higher Education Evaluation Council.

The Helsinki School of Economics, Helsinki University of Technology and the University of Art and Design Helsinki, all state-recognised universities, merged into Aalto University on 1 January 2010.

In January 2011, the Aalto University School of Science and Technology was reorganized into four schools: the Aalto University School of Chemical Technology, the Aalto University School of Electrical Engineering, the Aalto University School of Engineering and the Aalto University School of Science. In January 2012, the former Aalto University School of Art and Design and the Department of Architecture of the School of Engineering merged to form the Aalto University School of Arts, Design and Architecture. In August 2012, the Aalto University School of Economics was renamed the Aalto University School of Business. On 1 January 2017, the Aalto University School of Chemical Technology was renamed the Aalto University School of Chemical Engineering.

7. CERTIFICATION OF THE SUPPLEMENT

Date (dd/mm/yyyy)

31/07/2026

This diploma and its documents are electronically signed.

The authenticity of the signature can be verified at <https://dvv.fineid.fi/fi/validation>

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

The description of the higher education system has been prepared by the Finnish National Agency for Education in collaboration with the Ministry of Education and Culture.

Higher education system in Finland

The Finnish higher education system comprises universities (*yliopisto/ universitet*) and universities of applied sciences (*ammattikorkeakoulu/ yrkeshögskola*). The universities are tasked with engaging in scientific research and artistic activity, and with providing the highest level of education based on them. The universities of applied sciences are multidisciplinary institutions of professional higher education that engage in applied research and development.

University degrees

The Universities Act (558/2009, with amendments) and Government Decree on University Degrees and Professional Specialisation Programmes (794/2004, with amendments) define the objectives, extent and overall structure of degrees. The universities decide on the detailed contents and structure of the degrees they award. They also decide on their curricula and forms of instruction. English translations of all higher education degree titles are regulated at the national level.

First-cycle university degree (FiNQF/EQF6)

A first-cycle university degree is referred to as *kandidaatin tutkinto/ kandidatexamen*. Other first-cycle degree titles include *oikeusnotaarin tutkinto/ rättsnotarieexamen* (Law) and *farmaseutin tutkinto/ farmaceutexamen* (Pharmacy). The statutory English translation for all these degrees is Bachelor's degree, the most common degree titles being Bachelor of Arts and Bachelor of Science.

The first-cycle university degree consists of at least 180 credits, which corresponds to three academic years of full-time study. The scope of studies required for the degree of Bachelor of Fine Arts is at least 210 credits.

Studies leading to the degree may include basic and intermediate studies, language and communication studies, interdisciplinary study modules, other studies, and practical training for professional development. The degree includes a Bachelor's thesis (6 – 10 credits).

Second-cycle university degree (FiNQF/EQF7)

A second-cycle university degree is referred to as *maisterin tutkinto/ magisterexamen*. Other second-cycle degree titles include *diplomi-insinöörin tutkinto/ diplomingenjörexamen* (Technology),

proviisorin tutkinto/ provisorexamen (Pharmacy), *arkkitehdin tutkinto/ arkitektexamen* (Architecture) and *maisema-arkkitehdin tutkinto/ landskapsarkitektexamen* (Landscape Architecture). The statutory English translation for all these degrees is Master's degree, the most common degree titles being Master of Arts and Master of Science. The second-cycle university degree title in the fields of Medicine, Veterinary Medicine and Odontology is referred to as *lisansiaatin tutkinto/ licentiatexamen*, and the statutory English translation of the degree title is Licentiate.

The second-cycle university degree typically consists of at least 120 credits, which corresponds to two academic years of full-time study. The scope of studies required for the degrees of Master of Arts (Psychology), Master of Music and Licentiate of Odontology is at least 150 credits. The scope of studies required for the degrees of Licentiate of Veterinary Medicine and Licentiate of Medicine is at least 180 credits.

Prior to 1 August 2025, the scope of studies required was at least 360 credits for the degree of Licentiate of Medicine and at least 330 credits for the degree of Licentiate of Odontology, provided that the university arranged the education in such a way that no separate Bachelor's degree was awarded.

Universities may decide that the minimum scope of studies required for a Master's degree organised in international cooperation is 60 or 90 credits instead of 120 credits, except for degrees that, by law, constitute a specific eligibility requirement for a particular profession or position.

The studies leading to the second-cycle university degree may include basic, intermediate and advanced studies, language and communication studies, interdisciplinary studies, other studies, and an internship to develop expertise. The degree includes a Master's thesis (10 – 40 credits).

Third-cycle university degrees (FiNQF/EQF8)

The objective of postgraduate education is to provide students with an in-depth knowledge of their field of research and capabilities to produce novel scientific knowledge independently.

The postgraduate degree of *lisansiaatin tutkinto/ licentiatexamen* may be completed before the doctoral degree. The statutory English translation of the degree title is Licentiate.

The doctoral degree is referred to as *tohtorin tutkinto/ doktorsexamen*, and the statutory English translation of the degree title is Doctor. The doctoral degree takes approximately four academic years to complete after a second-cycle degree. A student who has been admitted to studies leading to a doctoral degree must complete a given amount of postgraduate studies determined by the university, demonstrate independent and critical thinking in their field of research, and prepare and publicly defend a doctoral dissertation. The scope of the studies leading to a doctoral degree has not been defined in national legislation in terms of academic years or credits.

University of applied sciences degrees

The Universities of Applied Sciences Act (932/2014, with amendments) and the Government Decree on Universities of Applied Sciences (1129/2014, with amendments) define the objectives, extent and overall structure of universities of applied sciences degrees. The universities of applied sciences decide on the detailed contents and structure of the degrees they award. They also decide on their curricula and forms of instruction. English translations of all higher education degree titles are regulated at the national level.

First-cycle university of applied sciences degree (FiNQF/EQF6)

A first-cycle university of applied sciences degree is referred to as *ammattikorkeakoulututkinto/yrkeshögskoleexamen*. The statutory English translation for the degree is Bachelor's degree, followed by the field of study, e.g. Bachelor of Engineering or Bachelor of Health Care.

The first-cycle university of applied sciences degree consists of at least 180, 210, 240 or 270 credits, corresponding to three to four and a half academic years of full-time study. The scope of studies required for the first-cycle university of applied sciences degree is specific to the field of study and laid down in the Annex to the Government Decree (1129/2014, with amendments).

The studies leading to a first-cycle university of applied sciences degree include basic and professional studies, elective studies, a practical training period (at least 30 credits), and a thesis project.

Second-cycle university of applied sciences degree (FiNQF/EQF7)

The degree is called *ylempi ammattikorkeakoulututkinto/ högre yrkeshögskoleexamen*. The statutory English translation for the degree is Master's degree, followed by the field of study, e.g. Master of Culture and Arts or Master of Business Administration.

The second-cycle university of applied sciences degree consists of at least 60 or 90 credits, corresponding to one to one and a half academic years of full-time study. The scope of studies required for the second-cycle university of applied sciences degree is specific to the field of study and laid down in the Annex to the Government Decree (1129/2014, with amendments). The scope of studies required for the degree of Master of Police Services is 120 credits.

Universities of applied sciences may decide that the minimum scope of studies required for a Master's degree organised in international cooperation is 120 credits, instead of 60 or 90 credits.

The studies leading to a second-cycle university of applied sciences degree include advanced professional studies, elective studies, and a thesis project.

Professional specialisation programmes (FiNQF/EQF6, FiNQF/EQF7)

Universities and universities of applied sciences offer professional specialisation programmes (*erikoistumiskoulutus/ specialiseringsutbildning*) for those who have completed a degree and have already entered working life. Professional specialisation programmes aim to promote professional development and specialisation by means of providing education based on research.

Provisions on the joint objectives and the minimum scope of professional specialisation programmes are laid down in the Government Decree on University Degrees and Professional Specialisation Programmes (794/2004, with amendments) and the Government Decree on Universities of Applied Sciences (1129/2014, with amendments). The minimum scope of professional specialisation studies is 30 credits.

Access and admission

Access to studies leading to a first-cycle degree

Applicants eligible for higher education studies leading only to a first-cycle degree, or to both a first and a second-cycle degree, offered by universities or universities of applied sciences, have completed either a Matriculation Examination (*ylioppilastutkinto/ studentexamen*),

an initial vocational qualification (*ammattillinen perustutkinto/ yrkesinriktad grundexamen*), a further vocational qualification (*ammattitutkinto/ yrkesexamen*), a specialist vocational qualification (*erikoisammattitutkinto/ specialyrkesexamen*), or a foreign qualification which in the awarding country provides eligibility for higher education studies.

In addition, a person who has completed a general upper secondary education syllabus and been awarded a general upper secondary education certificate (*lukion päättötodistus/ avgångsbetyg från gymnasiet*) is also eligible to apply for studies leading only to a first-cycle degree, or to both a first and a second-cycle degree, offered by universities of applied sciences.

Access to studies leading to a second-cycle degree

Applicants eligible for higher education studies leading only to a second-cycle degree, offered by universities or universities of applied sciences, have completed a relevant first-cycle degree awarded by a university or a university of applied sciences, or a relevant study programme abroad which in the awarding country provides eligibility for the corresponding level of higher education.

In addition, admission to studies leading to a second-cycle university of applied sciences degree requires a minimum of two years of work experience in the field concerned after the completion of a first-cycle university degree or a first-cycle university of applied sciences degree or other relevant higher education degree. In the fields of Crafts and Design, Media and Visual Arts, Theatre and Dance, and Music the requirement may be artistic activity of corresponding duration instead of work experience.

Access to studies leading to a third-cycle degree

Applicants eligible for studies leading to a third-cycle degree, offered by universities, have completed either a relevant second-cycle degree awarded by a university or a university of applied sciences, or a relevant study programme abroad which in the awarding country provides eligibility for the corresponding level of higher education.

Admission to higher education

Higher education institutions may have specific entry requirements in addition to the general entry requirements described above. Higher education institutions decide independently on student admissions and the recognition of prior learning.

Credit system

Higher education studies are expressed in credits (*opintopiste/ studiepoäng*, abbreviated *op/ sp*). Study units are quantified according to the workload required. One academic year of full-time study corresponds to an average of 1,600 hours of work input and is defined as 60 credits. The credit system complies with the European Credit Transfer and Accumulation System (ECTS).

Grading system

There is no national grading system in Finland. Higher education institutions have the autonomy to determine the grading system to be applied.

Quality assurance

The Finnish Education Evaluation Centre (FINEEC) is an independent authority responsible for the national evaluation of education. The evaluations of FINEEC cover the education system in its entirety, from early childhood education to higher education. Evaluation reports are available to the public. FINEEC is listed in the European Quality Assurance Register for Higher Education (EQAR) and is also a full member of the European Association for Quality Assurance in Higher Education (ENQA). For further information, please visit the following website: <https://www.karvi.fi/en>

Universities are governed by the Universities Act (558/2009, with amendments). The National Defence University is governed by the Act on the National Defence University (1121/2008, with amendments). Universities of applied sciences are governed by the Universities of Applied Sciences Act (932/2014, with amendments), and they require an authorisation granted by the Government to operate. The Police University College is governed by the Act on the Police University College (1164/2013, with amendments).

Recognised higher education institutions operating under the Ministry of Education and Culture's administrative branch, as well as the degrees they award, are defined in the Government Decree on the Structure of Higher Education Degrees (464/1998, with amendments).

For further information, please visit the following websites:

<https://okm.fi/en/universities> (a list of recognised universities in Finland)

<https://okm.fi/en/universities-of-applied-sciences> (a list of recognised universities of applied sciences in Finland)

National Qualifications Framework

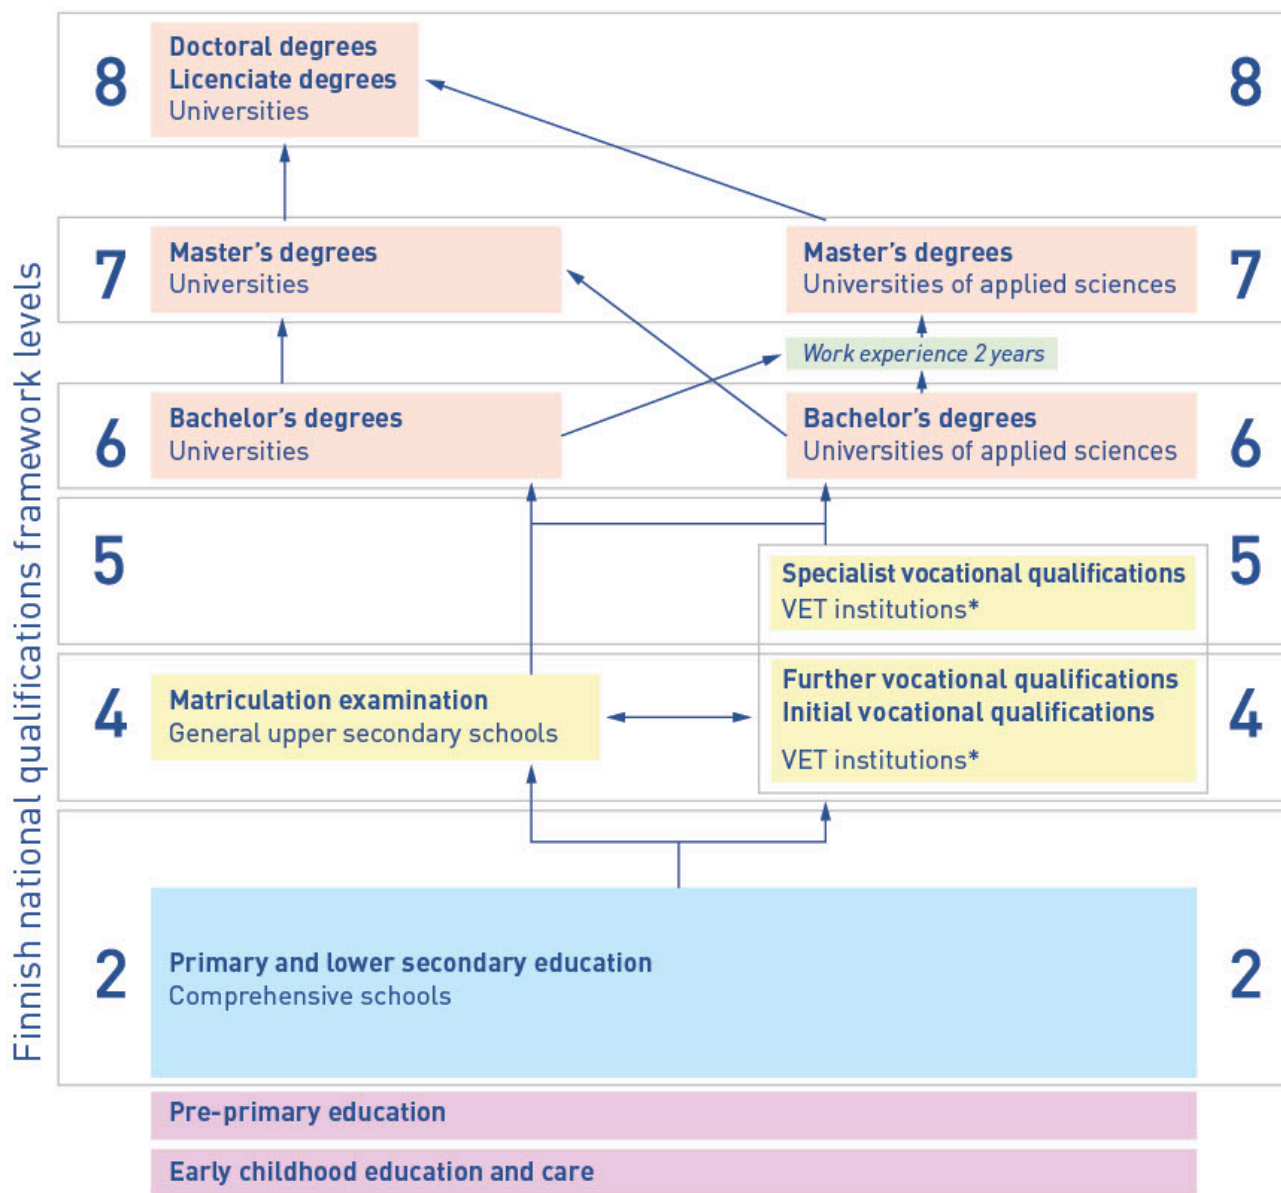

The Finnish National Framework for Qualifications and Other Competence Modules (FiNQF) is based on the European Parliament's and Council's Recommendation on the European Qualifications Framework for Lifelong Learning (EQF). The Finnish national qualifications framework is also in line with the European Higher Education Area (EHEA) qualifications framework.

Finnish higher education qualifications are referenced at levels 6, 7, and 8 in both the Finnish National Framework for Qualifications and Other Competence Modules (FiNQF) and the European Qualifications Framework (EQF).
